

## Other acquired brain damages

Most acquired brain damages are caused by apoplexy, i.e. bleeding or blood clot in the brain. The rest have other causes.

Latest update: 28. April 09:41

Each year 20,000 adults and 1,550 children and youth in Denmark get an acquired brain damage.

Among the adults approx. 12,500 brain damages are each year caused by blood clot or bleeding in the brain and the rest is caused by other acquired brain damages.

Other causes for brain damage are:

- Brain traumas
- Brain tumors
- Concussion
- Infections in the brain and its meninges
